When a user uploads a daily diary entry, they have the option to upload a photo from their computer or from within BuilderStorm itself - If they chose to upload a photo, we would like to add a 'Add Photos To Project Photos' checkbox.

- 'Add Photos To Project Photos' checkbox - when this is ticked, the photo uploaded would then be added into the Daily Diary Photo Gallery within Project Photos (example shown below)
- If the user decided they didn't want this box to be ticked, the photo would still upload with the diary entry and be visible in the daily diary section, however, the photo will not be saved in the Daily Diary Photo gallery within Project Photos.
- Daily Diary General Settings: a new setting is to be added within the daily diary, which determines whether this checkbox is ON/OFF by default. Defaults to OFF for new sites. "Add photos to project photos defaults to" - ON/OFF switch (example below)
- If the switch is turned ON - the checkbox will be visible and can be ticked when adding a new daily diary entry, this will then add the photo to Project Photos.
- If the switch is turned OFF - the checkbox will not be visible when adding a new daily diary entry and therefore the photo cannot be added to Project Photos

Example - Daily Diary Photo Gallery within Project Photos
